Micro Center® Recognizes Zoom® For Their 25 Year Partnership

Boston, Massachusetts, September 25, 2008-- Zoom Technologies, Inc. (NASDAQ: [ZOOM](#)) announced today that Micro Center has recognized Zoom for their partnership of over 25 years. During that time Zoom continuously supplied Micro Center products as a strategic partner. The designation as a 25 Year Partner places Zoom in a select group of only three suppliers who have worked with Micro Center continuously for the longest period of time. Intel and Epson were also recognized as 25 year partners at this month's Micro Center Vendor Appreciation Dinner.

Founded in 1979, Micro Center is number one on the Computer Retail News list of Fast Growth Retailers. Micro Center operates 21 stores in major markets nationwide. Those stores have the largest average floor space per store devoted exclusively to computers and computer related items in the U.S.

"We have had the pleasure of working with Zoom for over 25 years and during that time both our Companies have grown and transformed, yet both of our Companies have remained committed to our original business strategies," said Kevin Jones, Vice President of Merchandising. "For Micro Center that strategy has been providing 'Best in Class' computer technology and for Zoom it has been providing 'Best in Class' communications technology. I think it is that reliable focus which has allowed our two companies to survive and prosper while others have not."

"We are very pleased to receive recognition from Micro Center as a 25 Year Partner," said Frank Manning, President of Zoom Technologies. "Micro Center's success over nearly thirty years is a testimonial to their focus on providing excellent products with superior service. We value them greatly as a partner, and appreciate the leadership and strong business practices they continue to demonstrate."
